

## DISCOVERING CLIENT CAPABILITIES

### Abstract of the Disclosure

A network including a client and server may send capability determining software from the server to the  
5 client. At the client, the software determines the capability of each particular client, forms a message, and sends that message back to the server. Based on the message received as a result of the operation of the software, the server can better provide its services to the  
10 client in some embodiments.
